Indulge yourself in 5.2.2ch surround sound created by Dolby Atmos® or DTS:X, and even without height or surround speakers, you can still experience similar effects by Dolby Atmos Height Virtualizer and DTS Virtual:X. Enjoy superior images with Ultra HD, HDR10, HLG, and Dolby Vision™ pass through. Plus, the VSX-LX105 supports HDMI 2.1*1 for 8K, VRR, ALLM, and QFT pass-through for next-generation video and gaming. You can also stream songs from various sources via Music Server, Bluetooth®, DTS Play-Fi, Sonos system, and Apple AirPlay 2. It is Roon Tested, making music streaming easy from AV equipment. Other highlights include Powered Zone 2 feature with a dedicated DAC, Personal Preset buttons, 2 HDMI outputs, and it works with Alexa/Hey Google for voice control.

HDMI 2.1 for a powerful viewing and gaming experience

The VSX-LX105 ensures its HDMI terminals support 8K/60p (4:4:4/12-bit), 8K/30p (4:4:4/12-bit, 4:4:4/10-bit, 4:2:2/12-bit, 4K/120p (4:4:4/12-bit), 4K/60p (4:4:4/10-bit), 4:2:0/10-bit) video passthrough to compatible displays, as well as HDCP 2.3 so you will have no problem when upgrading to new devices. HDMI 2.1 also supports VRR (Variable Refresh Rate) to eliminate lag, stutter and frame-tearing to deliver a fluid gaming experience. Various enhancements such as ALL.M (All Molecules) and Quick Select enable you to optimize latency and further limit lag to ensure you’ll always be on top of your game.

Dolby Atmos®/Dolby Surround Upmixing

The VSX-LX105 is compatible with the 5.2.2ch configuration of the latest theater sound platform, Dolby Atmos®. You can reproduce object-oriented sound in smooth, curving movements, or the realistic three-dimensional movement overhead by the top speakers. Other audio codecs such as PCM and DSD can be upmixed using Dolby Surround for enjoying 3D surround sound.

DTS:X®/DTS Neural:X Upmixing

DTS:X is the next-generation audio codec from DTS that leverages object-based audio to enable new immersive and interactive audio experiences. Since DTS:X can automatically adapt the audio to the existing channels and speaker system, no specific speaker layout is required. Experience an immersive soundscape with incredibly rich and life-like audio. Other audio codecs such as PCM and DSD can be upmixed using DTS Neural:X for enjoying 3D surround sound.

Dolby Atmos Height Virtualization

When playing any Dolby format, engaging the Dolby Atmos Height Virtualizer enables a more immersive listening experience, creating a virtual surround and height effect from traditional speaker layouts without employing additional surround or height speakers.

DTS Virtual:X

With DTS Virtual:X, you can enjoy a three-dimensional immersive sound similar to DTS:X, without the need of height or rear speakers. The technology supports 2 to 7.1.4-channel input source, for delivery on 2 to 5.1 or even 7.1-channel speaker layout. DTS Virtual:X works with all DTS codecs, including DTS:X.

Personal Preset

Just press the Personal Preset button on the front panel for three seconds, and your current settings such as volume level and listening mode can be saved. Up to three presets can be registered and easily called up from the front panel button or the remote control.

Dialog Enhancement

With this unique mid-range sound control feature, you can make independent volume adjustments to the range including dialogs in films, with the up/down key on the remote control.

MCACC Auto Room Tuning

Create the optimum acoustic environment with Pioneer’s MCACC (Multi-Channel Acoustic Calibration System) developed with the expertise of professional recording studios. With the custom microphone, the system automatically compensates for differences in speaker size, level and distance, and equalizes response.

Works with SONOS

By bringing the VSX-LX105 into the Sonos eco-system with Connect or Port, you can play any music or audio source on your Sonos app. With “Volume Pass Through” mode selected at the Sonos App settings, you’ll be able to control the volume of the unit by Sonos app or by itself. Enjoy high-quality playback from the AV receiver by Sonos app, just as you would with your favorite Sonos system.

Powered Zone 2 with Dedicated DAC

With the powered feature, the VSX-LX105 can directly drive speakers in another room, without the need for a separate amplifier. What’s more, the dedicated DAC for Zone 2 lets you listen to all digital audio sources.

Zone B Output for Wireless Headphones

The VSX-LX105 is equipped with Zone B audio output terminals for expanding the Main Zone sound. You can listen to the sound playing in the living room via wireless headphones.

High-quality Audio Transmission by Bluetooth® Wireless technology

Stream songs from compatible devices with the built-in Bluetooth® Wireless Technology (ver. 4.2). The VSX-LX105 features A2DP/AVRCP profiles, supporting SBC/aptX/aptX HD codecs for transmitter and SBC/ AAC codecs for receiver. Not only can you listen music with the receiver via Bluetooth, but also listen to the main source sound of the receiver with a high-quality codec using compatible headsets. With Wake on Play function, the AV receiver automatically wakes up and switches input when a Bluetooth source starts playing.

Voice Control

The VSX-LX105 works with Hey Google, so you can control playback of various music services supported by Chromecast by asking a Google Assistant enabled device to play, stop, skip, or take the volume up or down. This receiver also works with Alexa, so you can ask Alexa to control playback of various music services or Internet radio with your voice, without using a remote control or smartphone app.
